R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

Lorem Ipsum

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nullam lacinia ex vel risus euismod tempor. Integer eget condimentum enim, id interdum felis. Donec at lacus nec sapien tempus vestibulum ac quis eros. Vivamus vitae nisl eu quam ullamcorper feugiat vel vel lorem. Integer hendrerit dui a ultrices mollis.

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
